DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 15-19, 21, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stucki (US 3,272,581 A) and in further view of Ellman et al. (US 5,518,310 A).

Stucki discloses a workstation comprising variable length dividers 6 and vertical dividers 2 defining spaces able to contain equipment of any type, including medical equipment, wherein the configuration of the compartments can be adjusted to accommodate items of various size, as shown in figures 1-24. Stucki does not disclose the workstation as being used for the medical equipment needs of a particular patient in a hospital. It would have been obvious to one having ordinary skill in the art at the time of the invention to have applied the workstation of Stucki to meet a hospital's need of storing medical equipment so that the workstation could be adjusted for various sized equipment. The method is inherently performed in the use of the workstation of Stucki for medical equipment.

Stucki does not disclose an opening in the rear for allowing medical cords to pass. Ellman et al. does disclose a medical cart comprising an opening 20 for allowing an electrical cord 42 to pass through the rear of the cart, as shown in figure 4. It would

have been obvious to one having ordinary skill in the art at the time of the invention to have provided the workstation of Stucki with the cord opening of Ellman et al. in order to allow an electrical cord to pass through the rear of the workstation plug in the electrical equipment.

Allowable Subject Matter

3. Claims 23 and 27-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. The applicant's arguments have overcome the rejection of claims 23 and 25-29.
